PROFESSIONAL SUMMARY

Product-focused Business Analyst with 3+ years of experience delivering SaaS and enterprise solutions across 7+ industries including hospitality, retail, manufacturing, entertainment, education, and food service. Experienced in building products from 0-1 through AI-enabled product delivery, Agile SDLC execution, MVP definition, stakeholder management, and workflow automation. Skilled in translating business requirements into scalable product solutions through user stories, process flows, backlog prioritization, and cross-functional collaboration. Hands-on exposure to AI-assisted research, product design, process optimization, and enterprise AI implementations including chatbots and Agentforce workflows.

PROFESSIONAL EXPERIENCE

Business Consultant

Quadrafort Technologies (Sept 2024 – Mar 2026) | Full-time

- Delivered AI-enabled SaaS and enterprise workflow solutions across 7+ industries including hospitality, retail, manufacturing, education, and food service using Agile delivery methodologies.
- Collaborated with business, design, and engineering teams to define product requirements, user stories, process flows, MVP scope, and sprint-aligned delivery plans.
- Supported AI-powered enterprise implementations including WhatsApp chatbot workflows for Rebel Foods and Agentforce-enabled process automation for Lemon Tree Hotels.
- Conducted stakeholder workshops, UAT sessions, release coordination, and product demos to support successful enterprise rollouts and adoption.
- Used GenAI-assisted research, workflow analysis, and documentation approaches to improve SDLC execution, operational efficiency, and process automation initiatives.

Business Analyst

Newsxsys Technologies (Mar 2023 – Feb 2024) | Full-time

- Contributed to MVP development and Agile delivery for SaaS products including ESmart Procure and College 24 by gathering requirements, defining workflows, and supporting product planning activities.
- Used AI-assisted research, process design, and prototyping approaches to accelerate documentation, workflow ideation, and SDLC execution.
- Created user flows, wireframes, dashboards, BRDs, FRDs, and user stories to support stakeholder alignment and development execution.
- Collaborated with cross-functional teams during sprint planning, testing, release cycles, and product enhancement discussions.

Operation Executive

9dot9 (Sep 2022 – Nov 2022) | Full-time

- Supported operational reporting, research, and workflow coordination activities through data analysis and documentation processes.
- Used AI-assisted research approaches for information gathering and operational analysis support.

Analyst

Motherson Sumi (Jul 2021 – Sep 2021) | Internship

- Supported business research, reporting, and data analysis activities for operational insights and decision-making.

Analyst

Sonalika Tractor (May 2018 – Jul 2018) | Internship

- Assisted in market research, documentation, and business reporting activities.
